  - > visit the website: **www.softonomy.com**

# Software Products

- Our portfolio of Software Products is growing to provide solutions for the following sectors:

- *> Financial Services, Banking, Insurance*

- *> Telecoms, Communications*

- *> Service Industries*

- *> Pharmaceutical, Biotech, Life Sciences*

- *> Manufacturing, Logistics, Retail*

# Software Services

- We provide:
  - > Skilled Software Professionals
  - > Commercial Experience and Expertise
  - > Flexibility: as and when required to suit projects
- We have access to a large pool of Talented People:
  - > Highly Skilled, Experienced and Motivated
  - > Delivering Results with Solid Quality
  - > On-site, Off-site or *Combined* (Local <u>and</u> Offshore)
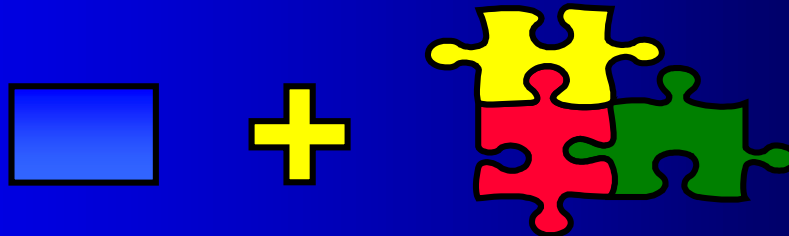

# Software Services

- We fulfil Roles in every stage of Software Development, including:

  - *> Business & Requirements Analysis*

  - *> Solution Architecture*

  - *> Design & Development*

  - *> Testing & Quality Assurance (QA)*

  - *> Maintenance & Support*

  - *> Project Management*

- for Enterprise, Multi-Tier, Client-Server, Database, Web and other application types
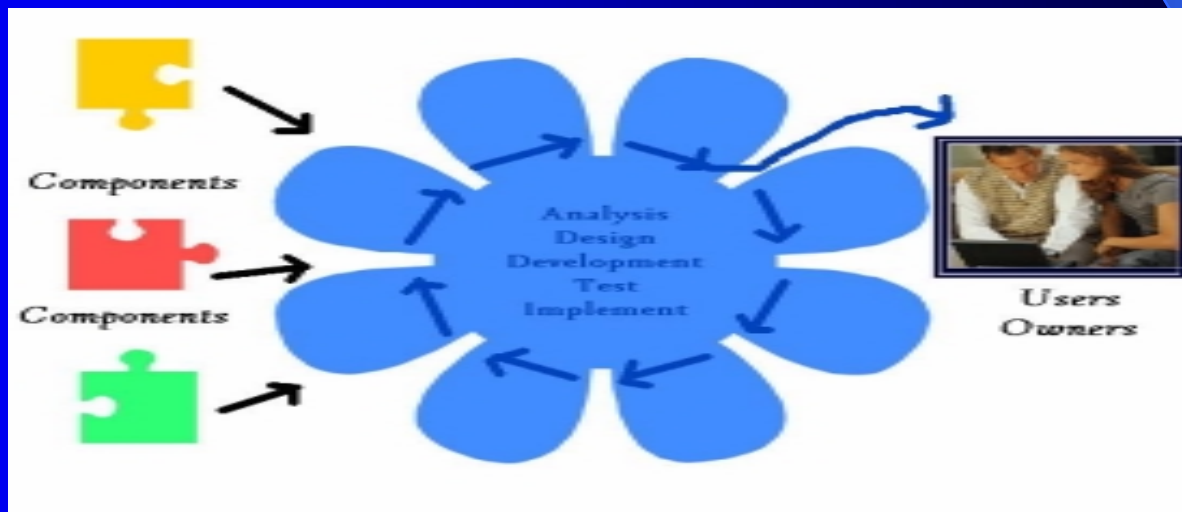

# Business Need

**The Need**:

> Software is a Powerful Business Tool

> it *can* improve Performance and Save Money

> These are well-known facts!

> *However*, acquiring the best-fitting functionality

> *and* in a cost-effective way
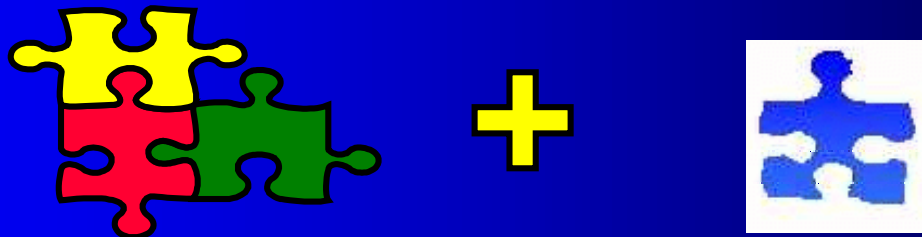

> is *not* a straight-forward task!

# Softonomy Approach

- **<u>The Solution</u>**

  - \> the **Softonomy** Approach to Building Software

  - \> Delivers a Better Way of Providing the Software

  - \> that your Business Needs <u>*and*</u> Deserves …….

# Softonomy Approach

- **<u>Expertise</u>**: Developing Software is our *Core Expertise*

- **<u>Fit</u>**: We build software solutions that *Match* your business needs, enabling your Business Processes and Organisation

- **<u>Flexible</u>**: We provide Skillsets and Resources on a flexible, agile and as-required basis

# Softonomy Approach

- **<u>Efficient</u>**: We build software using tried and tested Software Business Components

- **<u>Result</u>** => Robust Software Solutions tailored to your business need that can be acquired *cost-effectively*

# Softonomy Approach

- Our Software Solutions are Configurable to enable Clients to address business challenges *Optimally*

- We use *Iteration* when building solutions so Clients can "See and Feel" the software as it is being developed

- The Advantages are Compelling!

| Suppliers/Partners | CLIENT | Customers |

# Benefits

- **Skills**

  - > We provide *All* the Skills necessary

  - > use Streamlined Techniques to Capture Requirements

  - > Design, Develop, Test, QA

  - > Training, Change and Project Management

- We work *Closely* with Customers as solution success is paramount to all Stakeholders

# Benefits

- **Committed**
  - > We are *Dedicated* to the Solutions we provide …
  - > … for the *Long-Term*
  - > ongoing *Support & Maintenance*
  - > *Enhancements* allow a future path

- Facilitating Functionality Change when necessary, such as when Clients Business Needs Change

# Benefits

- **No-Nonsense**

  - > we work across a Wide Range of Technologies

  - > we are Practical about each

  - > we judge Technologies on their Merits

  - > both for Today and for their Future Path

  - > we *cut* through the Hype !!

# Benefits

- **Best Practice**
  - > we use Proven Techniques
  - > *and* follow Commercial & Academic developments
  - > ensuring the best for our Clients

# Technologies

- Some of the Technology Skills we provide include:

  - *> Java, C++, VB, SOAP, XML, J2EE, Servlets*

  - *> JSP, JavaBeans, SQL, UML, .NET*

  - *> databases, development tools, agile methods*

- We use a high-performance, secure, centrally managed Software Business Components engine

| C | C++ | Databases | VB | WSDL | XML |
|---|-----|-----------|-----|------|-----|
| Oracle | SQL server | ODBC | Platforms | CORBA | Jbuilder |
| J2EE | Apache | JSP | ASP | EJB | JavaBeans |
| IP | SOAP | HTML | HTTP | Dev Tools | CGI |
| COM+ | Languages | Java | Protocols | Visual Studio | SQL |
